Phnom Penh, Cambodia

Subject: Funding Request for Career & Digital Literacy Workshop at Samdech Techo Hun Sen Suong High School

Dear YRDP Team,

We, a group of Year 4 students majoring in PC at the Institute of Foreign Languages, are writing to request your kind support for a student-led workshop at Samdech Techo Hun Sen Suong High School, Tbong Khmum.

Our goal is to empower 12 students to make informed academic and career choices through interactive sessions. With full support from the school director, the project focuses on:

- Expanding career awareness through two parallel sessions introducing majors and careers in both Social and Real Sciences;
- Promoting gender equity by ensuring 80% of students feel equally supported in their choices;
- Boosting digital literacy by teaching practical skills like internet research and educational platform use;
- Engaging the community by involving teachers, parents, and local leaders for lasting support.

We believe this initiative aligns with YRDP's mission to empower youth through education and leadership. We humbly seek your financial support to bring this meaningful workshop to life and positively impact over 300 students.

We would greatly appreciate the opportunity to discuss this further and provide more details. Thank you for your consideration.

Sincerely,

Nang Sreynich

On behalf of the Year 4 PC Student Team

Institute of Foreign Languages, RUPP

## EXECUTIVE SUMMARY

The "Kid and Their Future Career" project aims to address the critical information gap faced by students in rural Cambodia regarding academic majors as they transition to higher education in Phnom Penh. Many students, particularly those from rural backgrounds, struggle to understand the differences between Social Science and Real Science tracks, leading to a high rate of major-switching over 93.1% of which is from STEM to non-STEM fields, as reported by the Cambodia Development Resource Institute (2022). This project will provide **workshops** at **Samdech Techo Hun Sen Suong High School**, offering clear information about various academic paths, real-life career examples, and mentorship from professionals. By fostering a supportive environment, the program aims to empower students to make informed decisions that align with their interests and goals.

To further enhance the impact of this initiative, the workshops will also tackle challenges such as limited internet access and gender disparities in STEM education. Sessions will inspire female students to pursue STEM fields and teach essential digital skills to all participants, ensuring equitable access to information. The project has four main objectives: increasing awareness of academic majors and career paths among 150 students per session, promoting gender equity in academic decisions with an aim for 80% of participants feeling equally supported, enhancing digital literacy skills, and engaging the local community by involving teachers and parents in the workshops. To achieve these goals, we are requesting a total **funding amount of \$663** to cover implementation costs, educational materials, and operational expenses over 2 days of the workshop operations.

## 2. GOAL AND OBJECTIVES

### ***Project Goal:***

Empower students at Samdech Techo Hun Sen Suong High School, Tbong Khmum, to make informed academic and career choices through interactive workshops supported by the school director.

### ***Objectives:***

1. Expand Career Awareness: Conduct two parallel sessions for 150 Grade 11, 12 students each, introducing diverse majors and career paths in Social Science and Real Science to align with their interests and skills.
2. Promote Gender Equity: Ensure 80% of participants feel equally supported in their academic choices, fostering an inclusive environment for both male and female students.
3. Boost Digital Literacy: Equip students with essential digital skills, including internet navigation, research, and educational platform use, to enhance learning and career exploration.
4. Engage the Community: Involve teachers, parents, and local leaders to provide ongoing support, reinforcing students' academic and career aspirations beyond the workshops.

### **3. EXPECTED OUTCOMES**

#### ***Short-Term Outcomes:***

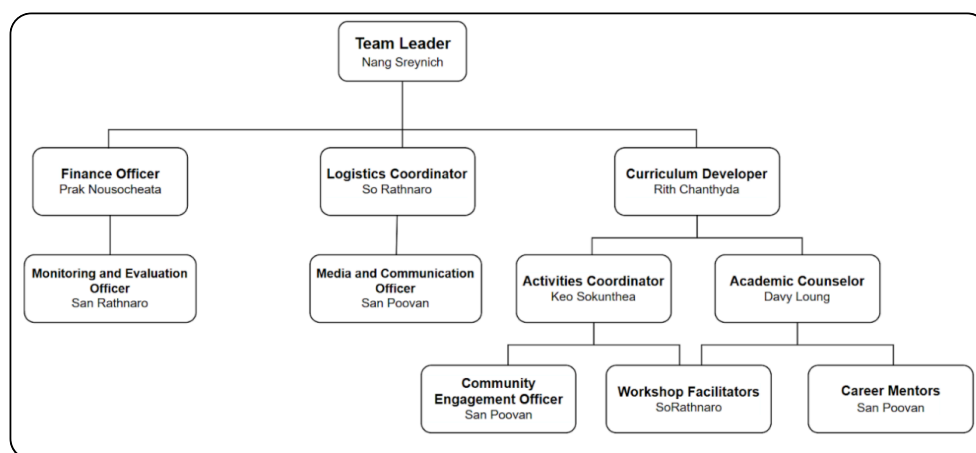

- Grade 12 students will gain a better understanding of academic tracks and career paths.
- 50%-80% of students feel confident in making career decisions, regardless of gender.
- Exposure to industry professionals helps students connect classroom learning to real-world careers.
- Improved digital literacy skills help students research academic and career options more effectively.
- Stronger guidance and encouragement from teachers, parents, and mentors.

#### ***Long-Term Outcomes:***

- More students choose academic tracks that match their strengths and career goals.
- Reduced gender bias in subject and career selection.
- Enhanced digital skills allow students to independently explore educational and career opportunities.
- Strengthened collaboration between schools, communities, and industry professionals in supporting students' future success.

## 4. PROJECT TEAM

### • TEAM STRUCTURE

### • ROLE AND RESPONSIBILITIES

| Role                            | Member Name      | Main Responsibilities                                                                                       |
|---------------------------------|------------------|-------------------------------------------------------------------------------------------------------------|
| Team Leader                     | Nang Sreynich    | Coordinate teams, collaborate with stakeholders, monitor progress, and evaluate impact.                     |
| Finance Officer                 | Prak Nousocheata | Manage budget, allocate resources, prepare financial reports, and seek funding.                             |
| Monitoring & Evaluation Officer | San Rothnaro     | Develop assessment tools, track engagement, analyze outcomes, and report effectiveness.                     |
| Logistics Coordinator           | San Rothnaro     | Handle transport, venue setup, material procurement, and technical support.                                 |
| Media & Communications Officer  | San Poovan       | Document activities, manage social media, develop promotional materials, and communicate with stakeholders. |
| Curriculum Developer            | Rith Chanthya    | Design lesson plans, create assessment tools, and integrate gender equity and digital literacy.             |
| Activities Coordinator          | Keo Sokunthea    | Plan and lead interactive sessions, adjust activities, and ensure student engagement.                       |
| Academic Counselor              | Davy Loung       | Provide career counseling, address gender biases, and guide students in academic choices.                   |
| Community Engagement Officer    | San Poovan       | Engage the community, organize teacher support sessions, and promote student collaboration.                 |
| Workshop Facilitators           | Sao Rothnaro     | Lead activities, support students, clarify doubts, and ensure participation.                                |
| Career Mentors                  | San Poovan       | Invite guest speakers, offer career advice, address student queries, and promote equal opportunities.       |

Here's a description of the budget breakdown:

#### Budget Description – Workshop at Samdech Techo Hun Sen Suong High School

This budget supports a one-day workshop for 12 students in Tbong Khmum Province. It includes:

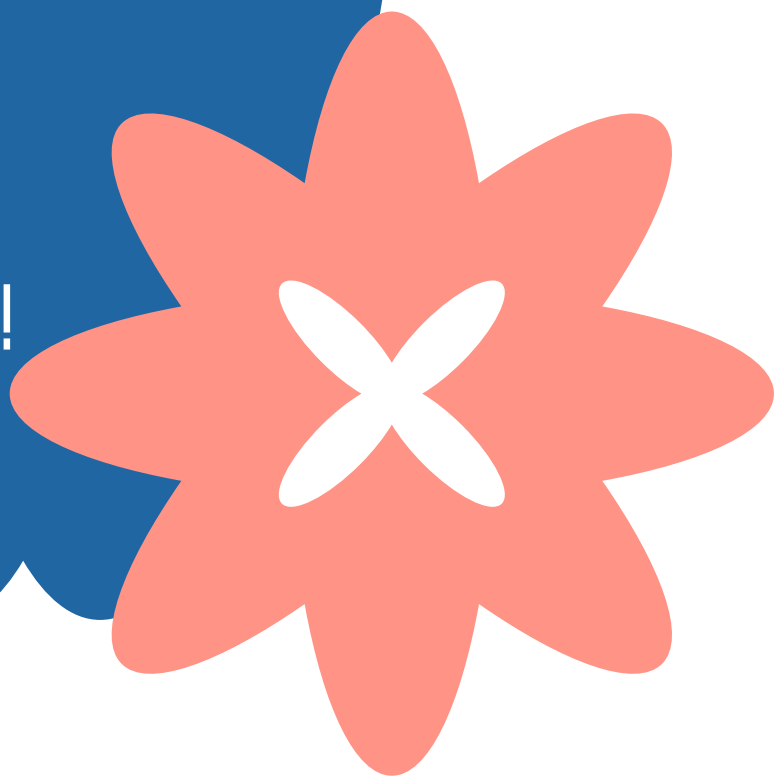

- Workshop Materials (\$294): Books, pens, stickers, posters, and printed brochures for student engagement and learning.
- Transportation (\$204): Travel costs for the team from Phnom Penh to Tbong Khmum and local travel between the hotel and school.
- Meals (\$90): Breakfast, lunch, and dinner for the organizing team during the workshop.
- Accommodation (\$60): One night stay for the team (2 rooms for 3 people).
- Refreshments (\$15): Snacks and water for participants.

Total Budget: \$663

This funding will help us create an interactive and inclusive learning experience for 300 high school students, empowering them to make better academic and career decisions.

# Thank you!
